OFF ☐ ON

Turn on service to view settings

Use Xsan to create a shared storage area network (SAN) between Macs on your local network. Macs in your SAN can easily read and write to your shared file system.

```

for (int j = 0; j < loc; j++) res[j] = buf[j];
return res;

public void checkRes(int[] res) {
    for (int i = 0; i < res.length; i++) {
        if (res[i] != checkRes[i]) {
            return;
        }
    }
}

public int[] decodeMessage(int[] res) {
    for (int i = 0; i < MAX_RES_LEN; i++) buf[i] = 0;
    int loc = 0;
    while (loc < res.length) {
        int i = 0;
        while (i < res.length) {
            if (res[i] != 0) {
                buf[loc] = res[i];
                loc++;
            }
            i++;
        }
    }
    return buf;
}

public int[] extractMessage(int[] res) {
    for (int i = 0; i < MAX_RES_LEN; i++) buf[i] = 0;
    int loc = 0;
    while (loc < res.length) {
        int i = 0;
        while (i < res.length) {
            if (res[i] != 0) {
                buf[loc] = res[i];
                loc++;
            }
            i++;
        }
    }
    return buf;
}

```
