

The Professional Apple Tech's Toolbox

Speaker Name

Allen Hancock received his Bachelor's in Early Childhood Education at the University of Missouri - Columbia. In 2000, Allen started the Mac Consulting Group, Inc: an Apple Specialist and Authorized Training Center based in Baton Rouge, Louisiana. There, he found his thrill in helping clients make the most of their computing experiences.

Over the course of his career, he met too many people as they suffered a failing hard drive without a current backup. As a means of preventing such loss, Allen founded Watchman Monitoring, Inc. Its namesake product is a Software as a Service tool which allows service providers to address such problems before it's too late.

Useful Tools for my consulting life.

TextWrangler

Feature	Benefit
It's free	One less thing to sell
Opens anything	View details like line endings
Process lines containing	isolate or delete excess info
Multi-File Search/Find All	Shows many instances
Opens binary plists	No need to convert

Got Root?

sudo allows great power from the normal user-space.

The *sudo* Terminal command can be used by administrators to execute commands as root.

sudo command requires a non-blank admin password .

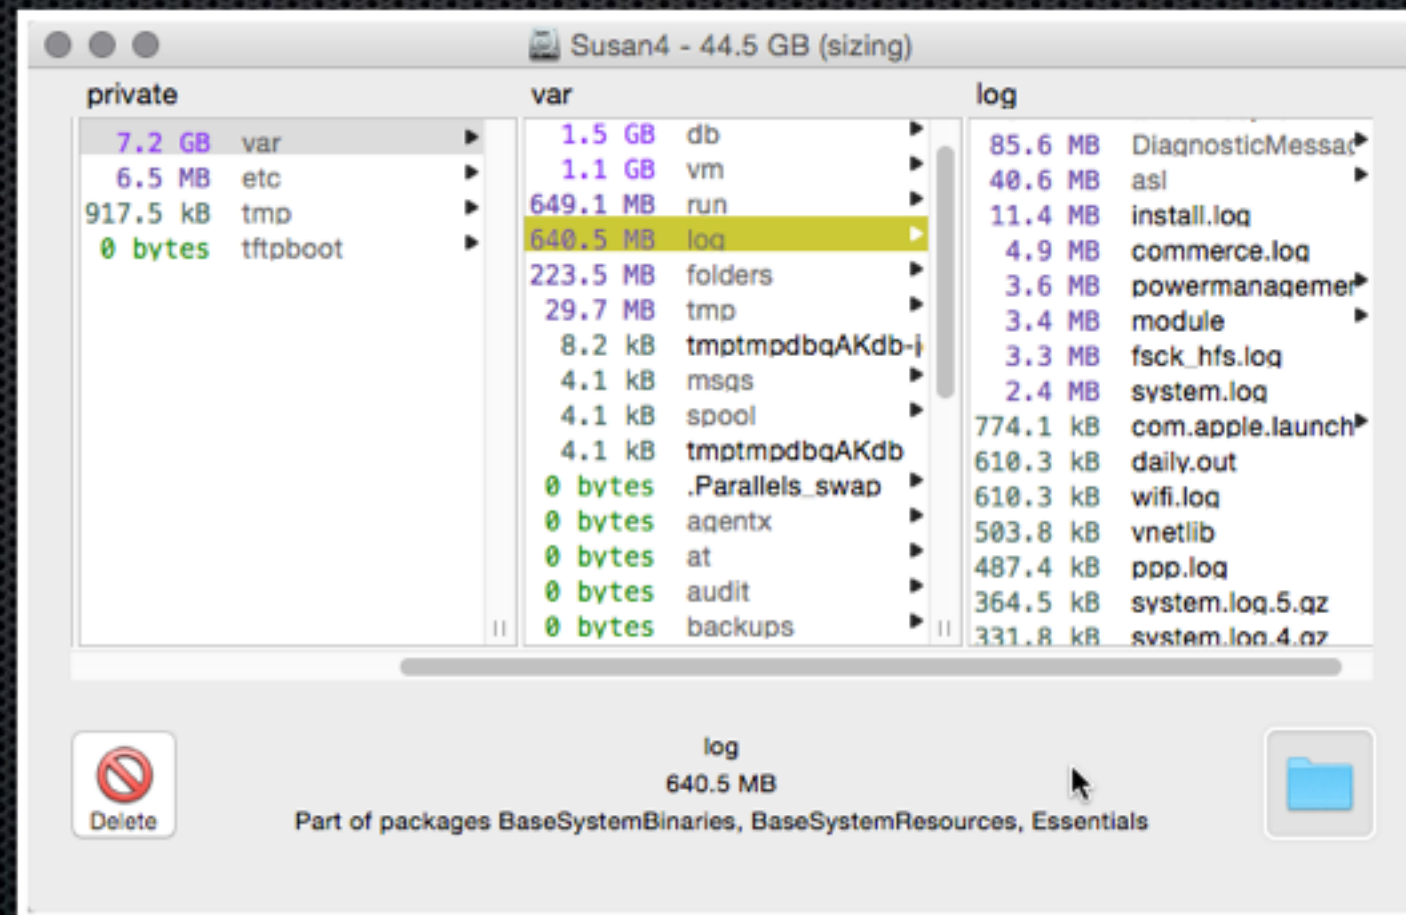

[[HT202035](#)]

Out of Space?

- OmniDiskSweeper
 - `sudo /path/to/OmniDiskSweeper.app/Contents/MacOS/OmniDiskSweeper`
 - Command `.` to quit the app.

Out of Space?

- du - disk usage statistics
 - -h - human readable
 - -d # - depth
 - -c - grand total

`du -h -d 0 -c ~` - get your home directory stats

```
287M/Users/demo/.Trash
134M/Users/demo/Desktop
 21M/Users/demo/Documents
 56M/Users/demo/Downloads
522M/Users/demo/Library
  0B/Users/demo/Movies
 76K/Users/demo/Music
7.2M/Users/demo/Pictures
...
1.0G/Users/demo/
1.0Gtotal
```

Space Commands

- df - display free space
- du - display disk usage statistics
 - -h (human readable)
 - -d # (depth)
 - -c (grand total)

du -h -d 1 -c ~ - get your home directory stats

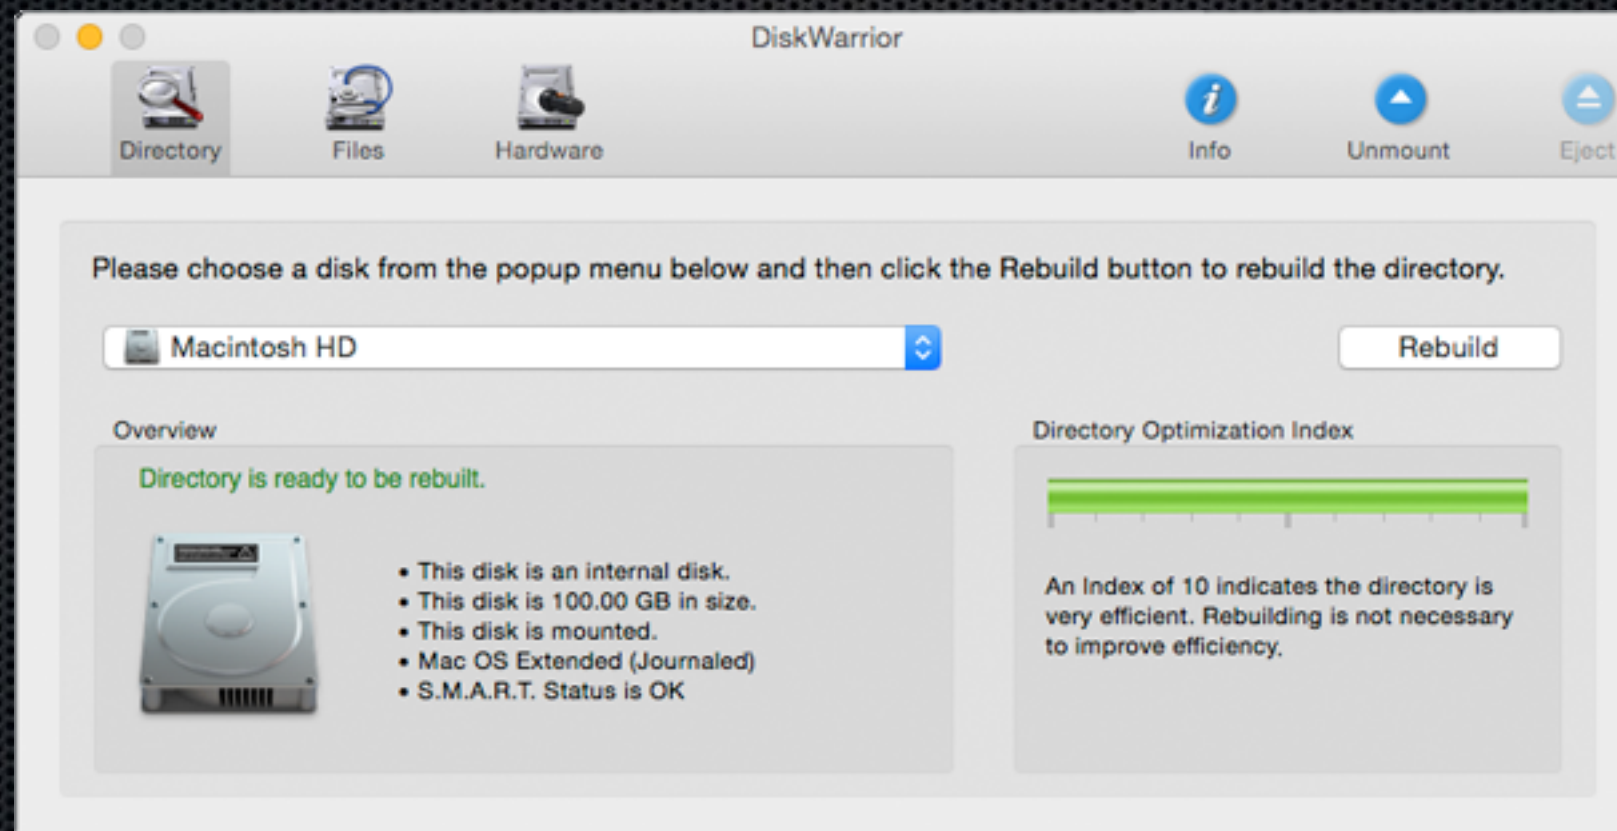

```
11G /Users/user/Desktop
10G /Users/user/Documents
3.1G /Users/user/Downloads
1.4G /Users/user/Dropbox
11G /Users/user/Library
0B /Users/user/Movies
99G /Users/user/Music
8.4G /Users/user/Pictures
144G /Users/user
144G total
```

DiskWarrior

With a single click, DiskWarrior reads the damaged directory and finds all salvageable files and folders and builds a new error-free, optimized directory for you to use.

Packages, demystified

- Pacifist
 - Just what's in the package?
 - What are the scripts going to do before, or after?
- Suspicious Package Quick Look Plugin
 - Select any installer package in the Finder, and choose Quick Look from the File menu — or just press the spacebar.
 - Suspicious Package will examine the package, and show a preview in the Quick Look window.

Packaging, demystified

- Packages
 - “Just make a package”..yeah right. Right!
 - Learn by example feature
 - Put files where they need to be, permissions included
 - Let your end-users run scripts with a pkg

Hello, Who's on my LAN?

- Bonjour Browser
 - Effortlessly discovers
Macs and recent printers
on your LAN.
 - Displays great
information for locating
devices.
 - Bring your copy & paste!

Hello, Who's on my LAN?

- Ping the Broadcast Address for all devices to respond
 - `ping 255.255.255.255`
 - Use `arp -a` for a list of all discovered devices
 - The result is a list of IP and MAC addresses
 - lookup the MAC address vendor code on the IEEE list

```
$ arp -a
? (10.0.1.1) at 70:56:81:c6:6a:5d on en1 ifscope [ethernet]
? (10.0.1.7) at 58:55:ca:f1:57:c1 on en1 ifscope [ethernet]
```

www.coffer.com translates 70-56-81 (hex) to “Apple”

Man, oh man

- ManOpen
 - Free install
 - Command-O to Open
 - Command-Shift-A to “apropos”

Stream Watching

tcpflow

- What's the benefit? Follow along:
- Download TCPFlow - Rudix
- Figure out which network-interface has the interesting traffic (en0, etc)
- Follow one of these examples:
 - `sudo /usr/local/bin/tcpflow -c -i en0 host 10.0.1.1`
- Watches all traffic to 10.0.1.1
 - `sudo /usr/local/bin/tcpflow -c -i en1 tcp port 80`
- Watches all traffic on port 80
- This is especially handy when troubleshooting smtp process, or directory server setup (before enabling ssl)
- Learn more at: office.mvps.org/troubleshoot/tcpflow.html

Masked addresses?

- SubnetCalc or SubnetMask.info
 - Endless Mask Calculations
 - See ranges, see broadcast.
- Network PreferencePane
 - Set TCP to manual, enter the ip & mask. 10.0.1.1/24

A screenshot of the SubnetCalc application window. The window has a title bar with three window control buttons. The main content area has a tabbed interface with four tabs: 'Address', 'Subnets', 'Subnets/Hosts', and 'CIDR'. The 'Subnets' tab is selected. In the 'Address' field, '10.0.1.1' is entered, and a 'Calc' button is next to it. Below the tabs, there are three columns of input fields: 'Subnet Bits' (16), 'Mask Bits' (24), and 'Subnet Mask' (255.255.255.0). Below these are 'Max Subnets' (65536) and 'Max Hosts / Subnets' (254). A 'Subnet Host Address Range' field shows '10.0.1.1 - 10.0.1.254'. At the bottom, 'Subnet ID' is '10.0.1.0' and 'Subnet Broadcast' is '10.0.1.255'.A screenshot of the Network Preference Pane for IPv4 configuration. The 'Configure IPv4' dropdown is set to 'Manually'. The 'IP Address' field contains '10.0.1.1/24'. The 'Subnet Mask' and 'Router' fields are empty.

Hey, where's my stuff?

- EasyFind
 - It's fast!
 - Finds anywhere on the filesystem, even inside files
 - So much control you'd think it was Sherlock
- FoxTrot
 - Indexes data for fast, up to date results
 - Search a network share? OK
 - SMB, NAS, OS X Server
 - Pro Versions can keep a running current index

Dude, where's my screenshot?

- SnapNDrag
 - Simple screenshots of sections, windows, etc.
 - Keeps all screenshots in a central library
 - Resize, edit in Preview, revert to original
 - Rename & share
- Skitch
 - Advanced options for marking up images.
- Clarify
 - Quickly generate instructions with screenshots
 - Customize with branded template
 - Professional looking

Get off of my Mac

- BatChmod
 - Keeps all my 755s 755, recursively, if I want.
 - Strip xattr from files with ease.
- chflags
 - `chflags nohidden` will find that missing volume
- SideTrash
 - Move a file to the trash via Proxy icon
 - Useful if you like to have the trash available on every Finder window

Too many ads

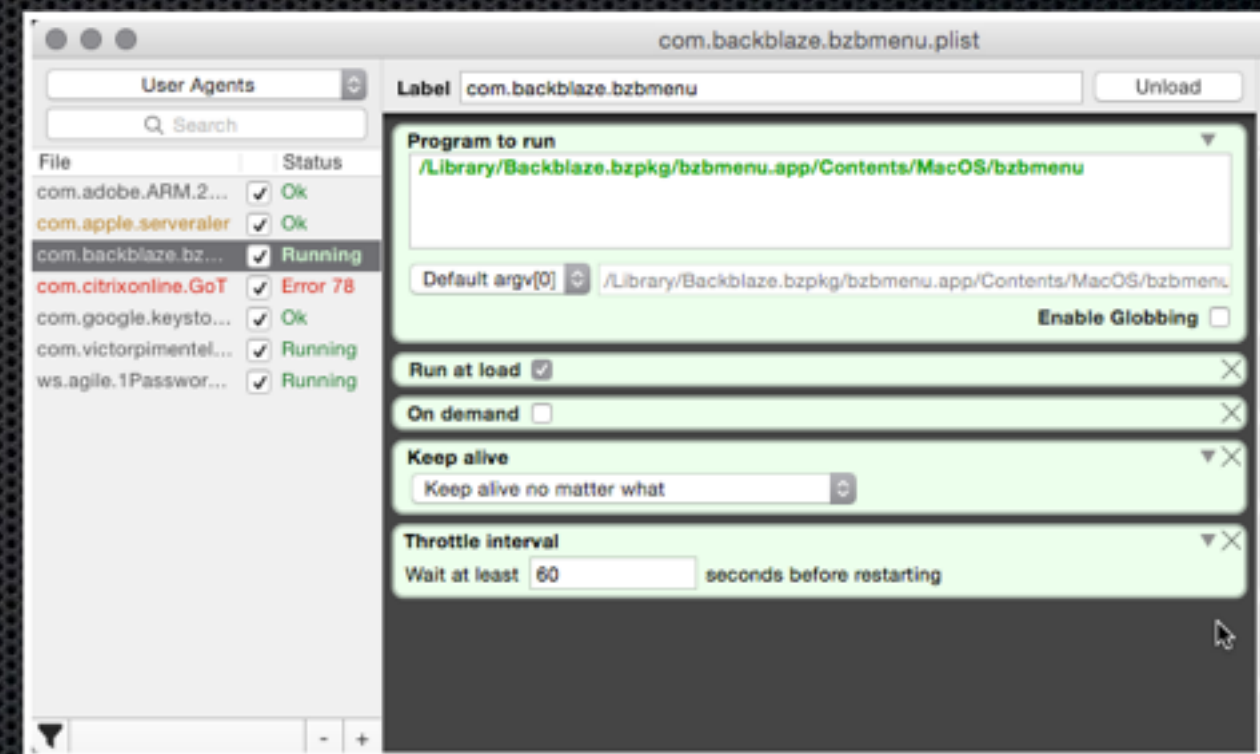

- Yes, Another Plug for
- AdwareMedic
 - Worst feature?
 - Best feature?
 - It has to be run manually

LaunchD-what?

- LaunchControl
 - Discover what's going on on your computer.
 - What's being run, from where, when.
 - Troubleshoot background processes
- launchd.info - Learn what makes a Mac mac.

Email tools

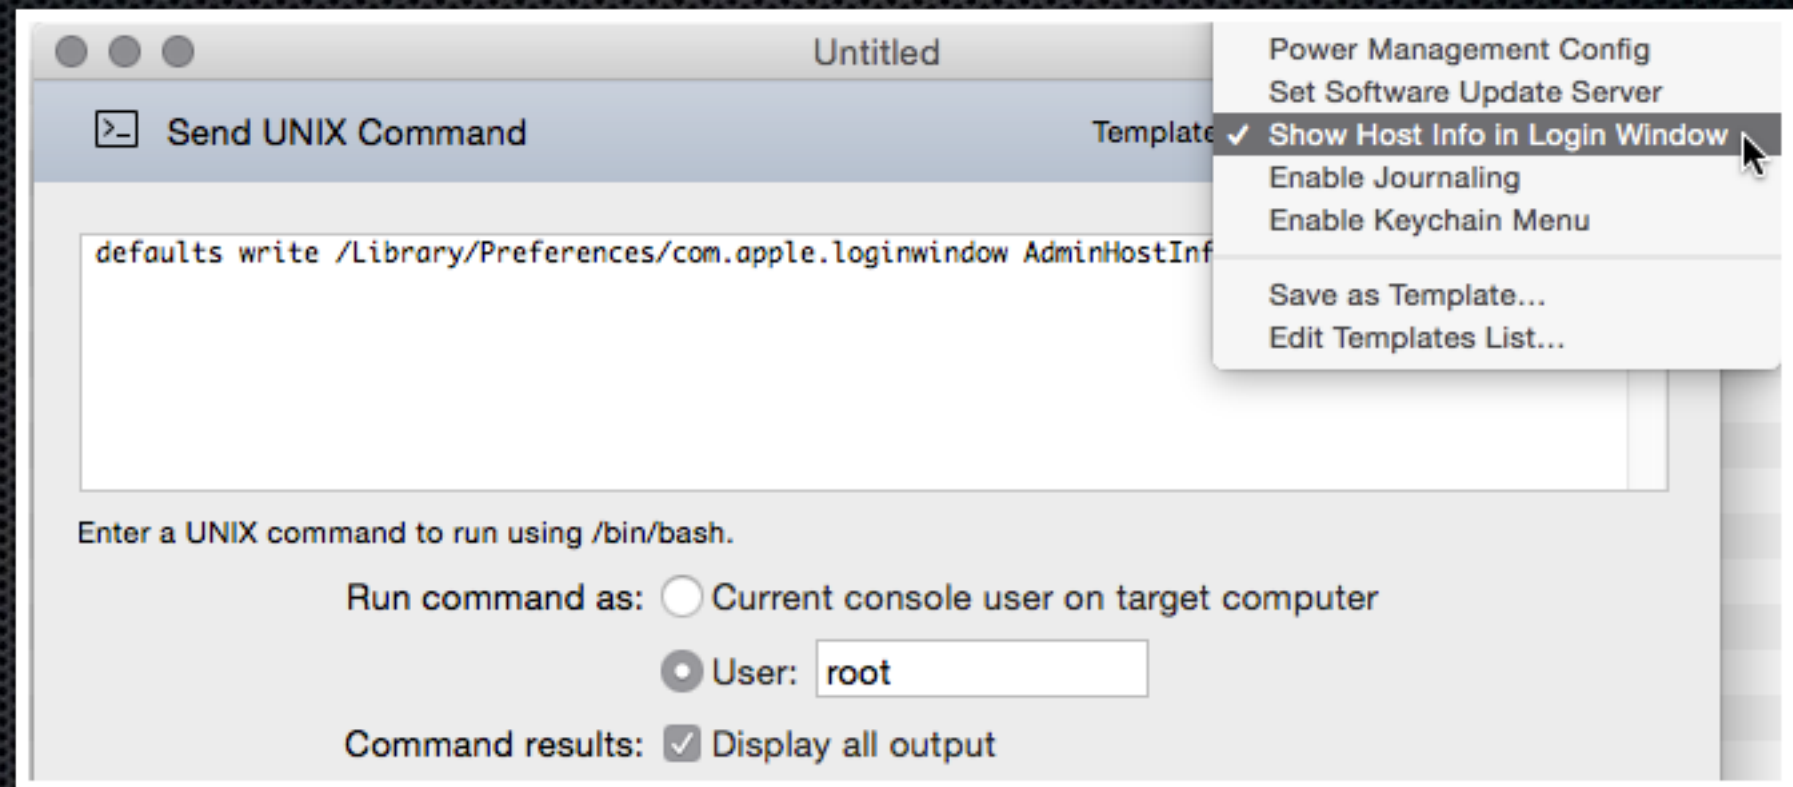

- Emailchemy
 - Convert, Migrate, Manage any format to any format.
- Email Extractor
 - Extracts every email address from a Mailbox & more.

ARD - Apple Remote Desktop

Save time, improve memory

- Save common items to the sidebar.
- Save scripts as templates
- Repeat!
- Remember!

- <http://j.mp/MacTech-Pro-Allen-Command>

~/Library/Application\ Support/Remote\ Desktop/Presets/UnixCommandTask.plist

Database Administration

- Sequel Pro - MySQL, Free
- Portico (formerly PG Commander)
Postgres, simple, friendly
- phpMyAdmin - MySQL, Free, web-based
